You can use an e-reader app on your computer, too, to make reading and organizing your ebooks easy.

Aquaponics Everything You Need To

Aquaponics allows plants and other living creatures to cohabitate within a shared environment, while taking advantage of each other's assets. Here is a breakdown of its basic functioning. Step 1 - Fish, or whichever animals are being raised, need to be fed regularly on food chosen by the grower/caretaker. It can be any commercial food available in pet stores or aquaculture stores, a homemade mix of organic ingredients, or anything in between.

Everything you need to know about aquaponics | Sensi Seeds

An aquaponic system is comprised of: Grow bed: this is where the plants are grown The media: gravel or small rocks that keep the roots of the plants in place The fish tank The biofilter: this is where those hard-working bacteria live and reproduce. Many grow beds nowadays have built-in...
