Case Management And Care Coordination

Similar to and working with the primary care physician's care coordination efforts, CMSA states that case management is “a collaborative process of assessment, planning, facilitation, care coordination, evaluation and advocacy for options and services to meet an individual's and family's comprehensive health needs through communication and available resources to promote patient safety ...

Case management versus care coordination | Elation Health ...

Case managers and social workers, as well as case management departments in general, should be adequately designed and staffed to allow for the time-intensive nature of care coordination. This role should be considered just as important as discharge planning or utilization management if case managers and departments are to achieve and sustain better outcomes for their patients and organizations.

Coordination of Care and the Role of the Case Manager ...

In conceptualising any case management programme (i.e. case management or care coordination), the Mental Health Service has to be aware that most staff would have had no training or experience in case management. Moreover, case management can challenge staff’s very fundamental assumptions about the provision of care and treatment.
