Photo Printer Buying Guide

Photo quality - When buying a photo printer there are a lot of factors that affect photo quality, including the type of ink, printing method, type and quality of paper. In general, stay away from printers that prioritize speed. Though photo printers can be fast, a good rule of thumb is that fast printing decreases print quality.

The 10 Best Photo Printers of 2020 - Lifewire

Features To Look For In Photo Printers. Before you decide which photo printer would be the perfect new addition to your household (and late Christmas present, too), check out which key features you need to look out for. Resolution - For decent quality pictures, you'll need a DPI (dots per inch) of 300 or more. This won't provide the high-definition photographs you get with larger printers, but for compact and portable options, and considering the paper size, it will look perfect.
