You can use awk to target the inet line and then print out just the IP address: ip a s eth0 | awk -F '[\/]+' '/inet / {print $3}' The -F flag tells awk to delimit by forward slashes or spaces using the regular expression [\/]+. This splits the line inet 172.17.0.11/16 into separate fields. The IP address is in the third field because the spaces at the start of the line also count as a field, since you delimited by spaces as well as slashes.
