and costs of regulatory and other policy options in comparison to a without regulation _ (or ^no action _) baseline.

GUIDELINES FOR REGULATORY IMPACT ANALYSIS

Agencies use estimates of values of risk reductions when conducting a benefit-cost analysis of a new policy or regulation that may affect public health. For example, many of the air and water pollution control regulations that are implemented by the EPA will reduce the risks of certain types of cancers, respiratory illnesses, and other diseases among large portions of the general public.

Mortality Risk Valuation | Environmental Economics | US EPA

Estimating the Benefits of Reducing Greenhouse Gas Emissions EPA and other federal agencies use estimates of the social cost of carbon (SC-CO₂) to value the climate impacts of rulemakings. The SC-CO₂ is a measure,
